

For consigned parts, please see our detailed instructions below:

To ensure we can deliver timely service, please label the parts with our quotation number and item number (like 63664A1#23, 63664A1#34...). This is critical since our production department needs the information to recognize the components. (If the parts do not get labelled properly, your order may get delayed due to the increase of processing time)

Please ship all the parts in one shipment from your office to us and declare the value in the invoice as small as possible. We suggest 20% of its actual value.

Cut tapes are acceptable, but we need extra 50 pcs for cheap and small packages like resistors and capacitors. This is required in SMT machine placement.

Please send us the tracking number when it is available, so we can better follow up the package.

The shipping address is:
